Chapter 1

Hierarchical Index

1.1 Class Hierarchy

This inheritance list is sorted roughly, but not completely, alphabetically:

MonoBehaviour	
box	5
buttonPlay	5
collision	6
gravityShift	6
LevelSelect	6
RobotControllerSript	7
RobotLEFT	7
RobotUP	8
trigger	9
UIManager	9
win	10

Chapter 2

Class Index

2.1 Class List

Here are the classes, structs, unions and interfaces with brief descriptions:

box	5
buttonPlay	5
collision	6
gravityShift	6
LevelSelect	
Level select: searches PlayerPrefs for key to unlock levels, if found, it will destroy the lock for the level	6
RobotControllerScript	
Robot controller scrip. Used to Control player and change gravity in scene. Also used to detect collision on player	7
RobotLEFT	
RobotLEFT : This is used to start a level with the gravity oriented so the player falls left. Otherwise, it is the same script as RobotControllerScript	7
RobotUP	
RobotUP : This is used to start a level with the gravity inverted so the player falls upwards. Otherwise, it is the same script as RobotControllerScript	8
trigger	9
UIManager	
UI Manager: Creates functions to be called when a button is clicked in the main menu	9
win	10

Chapter 3

Class Documentation

3.1 box Class Reference

Inheritance diagram for box:

Public Attributes

- bool `finish` = false
box: collision detection for the box.

3.1.1 Member Data Documentation

3.1.1.1 bool box.finish = false

box: collision detection for the box.

Parameters

<i>finish</i>	Determines if the box has opened the door yet.
---------------	--

The documentation for this class was generated from the following file:

- box.cs

3.2 buttonPlay Class Reference

Inheritance diagram for buttonPlay:

Public Attributes

- GameObject **Play**
- GameObject **Levels**
- GameObject **Credits**

The documentation for this class was generated from the following file:

- buttonPlay.cs

3.3 collision Class Reference

Inheritance diagram for collision:

The documentation for this class was generated from the following file:

- collision.cs

3.4 gravityShift Class Reference

Inheritance diagram for gravityShift:

The documentation for this class was generated from the following file:

- gravityShift.cs

3.5 LevelSelect Class Reference

Level select: searches PlayerPrefs for key to unlock levels, if found, it will destroy the lock for the level.

Inheritance diagram for LevelSelect:

3.5.1 Detailed Description

Level select: searches PlayerPrefs for key to unlock levels, if found, it will destroy the lock for the level.

The documentation for this class was generated from the following file:

- LevelSelect.cs

3.6 RobotControllerSript Class Reference

Robot controller sript. Used to Control player and change gravity in scene. Also used to detect collision on player.

Inheritance diagram for RobotControllerSript:

Public Attributes

- float **maxSpeed** = 10f
- bool **facingRight** = true
- Transform **groundCheck**
- LayerMask **whatIsGround**
- float **jumpForce** = 700f
- int **jumpdir**
- AudioClip **crush**
- bool **dead** = false

3.6.1 Detailed Description

Robot controller sript. Used to Control player and change gravity in scene. Also used to detect collision on player.

Parameters

<i>grounded</i>	Detects if the player is standing on something
<i>facingRight</i>	Detects which direction the player is standing
<i>whatIsGround</i>	Allows the developer to dictate what is consider ground for grounded variable.
<i>damping</i>	Buffer to tell how much to flip character when gravity shifts
<i>jumpdir</i>	Variable to track gravity orientation
<i>dead</i>	Tracks if character was killed

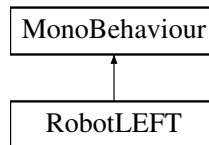

The documentation for this class was generated from the following file:

- RobotControllerSript.cs

3.7 RobotLEFT Class Reference

RobotLEFT: This is used to start a level with the gravity oriented so the player falls left. Otherwise, it is the same script as RobotControllerScript.

Inheritance diagram for RobotLEFT:

Public Attributes

- float **maxSpeed** = 10f
- Transform **groundCheck**
- LayerMask **whatIsGround**
- float **jumpForce** = 700f
- int **jumpdir**
- AudioClip **crush**

3.7.1 Detailed Description

[RobotLEFT](#): This is used to start a level with the gravity oriented so the player falls left. Otherwise, it is the same script as RobotControllerScript.

The documentation for this class was generated from the following file:

- RobotLEFT.cs

3.8 RobotUP Class Reference

[RobotUP](#): This is used to start a level with the gravity inverted so the player falls upwards. Otherwise, it is the same script as RobotControllerScript.

Inheritance diagram for RobotUP:

Public Attributes

- float **maxSpeed** = 10f
- Transform **groundCheck**
- LayerMask **whatIsGround**
- float **jumpForce** = 700f
- int **jumpdir**
- AudioClip **crush**

3.8.1 Detailed Description

[RobotUP](#): This is used to start a level with the gravity inverted so the player falls upwards. Otherwise, it is the same script as RobotControllerScript.

The documentation for this class was generated from the following file:

- RobotUP.cs

3.9 trigger Class Reference

Inheritance diagram for trigger:

Public Attributes

- GameObject **movingWall**
- string **doorOpen**
- GameObject **success**
- GameObject **elect1**
- GameObject **elect2**
- bool **isOpen** = false
- AudioClip **Zap**

The documentation for this class was generated from the following file:

- trigger.cs

3.10 UIManager Class Reference

UI Manager: Creates functions to be called when a button is clicked in the main menu.

Inheritance diagram for UIManager:

Public Member Functions

- void **StartGame** ()
- void **Levels** ()
- void **Credits** ()
- void **TitleMenu** ()
- void **Mute** ()
- void **ErasePlayerPrefs** ()
- void **LL1** ()
- void **LL2** ()
- void **LL3** ()
- void **LL4** ()
- void **LL5** ()
- void **LL6** ()
- void **LL7** ()
- void **LL8** ()

- void **LL9** ()
- void **LL10** ()
- void **LL11** ()
- void **LL12** ()
- void **LL13** ()
- void **LL14** ()
- void **LL15** ()
- void **LL16** ()
- void **LL17** ()
- void **LL18** ()
- void **LL19** ()
- void **LL20** ()

3.10.1 Detailed Description

UI Manager: Creates functions to be called when a button is clicked in the main menu.

The documentation for this class was generated from the following file:

- UIManager.cs

3.11 win Class Reference

Inheritance diagram for win:

The documentation for this class was generated from the following file:

- win.cs
